DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

The changes made to 35 U.S.C. 102(e) by the American Inventors Protection Act of 1999 (AIPA) and the Intellectual Property and High Technology Technical Amendments Act of 2002 do not apply when the reference is a U.S. patent resulting directly or indirectly from an international application filed before November 29, 2000. Therefore, the prior art date of the reference is determined under 35 U.S.C. 102(e) prior to the amendment by the AIPA (pre-AIPA 35 U.S.C. 102(e)).

2. Claims 1, 2, 7, 8, 11, 12, 14, 15, 17 and 20 are rejected under 35 U.S.C. 102(e) as being anticipated by Kuroe, et al. (6,846,009).

Kuroe teaches an airbag device for a motorcycle having a handlebar 108 the airbag device comprising an airbag 120; and a retainer 121 with at least one of the airbag and the retainer being secured to the handlebar. The airbag and the retainer include mounts (see figure 7) for being are secured to the handlebar. The handlebar has a pair of laterally spaced and generally upwardly extending side portions, and the retainer extends between the handlebar side portions. The retainer or the airbag

Art Unit: 3616

include portions that extend laterally beyond the handlebar side portions. The retainer and the airbag are disposed entirely between the handlebar side portions.

Claim Rejections - 35 USC § 103

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. Claim 18 is rejected under 35 U.S.C. 103(a) as being unpatentable over Kuroe, et al. (6,846,009) in view of Folsom, et al. (5,501,489).

Kuroe teaches the claimed invention except for the airbag having a roll-folded configuration. Folsom teaches an airbag 10 wherein the airbag is roll-folded in the housing 22. Based on the teachings of Folsom, it would have been obvious to one having ordinary skill in the art at the time the invention was made to have the airbag of Kuroe roll-folded to provide a more uniform deployment of the airbag.

Allowable Subject Matter

5. Claims 3-6, 9, 10, 13, 16 and 19 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Conclusion

6. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
